GUIDE FOR TYPST POLYTECHNIQUE PACKAGE

A modern alternative to LaTeX

July 2024 - August 2024

RÉMI GERME

GUIDE CONTENT

1 - DISCOVERING TYPST AND THE TEMPLATE

Typst is a user-friendlier alternative to LaTeX.

1.1 - COVER PAGE

```
// Defining variables for the cover page and PDF metadata
#let title = [guide for typst #linebreak() polytechnique package]
#let subtitle = "A modern alternative to LaTeX"
#let short_title = "package guide"
#let authors = ("Rémi Germe")
#let date_start = datetime(year: 2024, month: 07, day: 05)
#let date_end = datetime(year: 2024, month: 08, day: 05)

#set text(lang: "en")

#polytechnique.cover.cover(title, authors, date_start, date_end, subtitle: subtitle)
```

Set text lang to `fr` if you want the months in French.
You can also specify `short_month: true` in the call to cover to get month abbreviations.

1.2 - DOING SOME MATH

It is really easy to do some math, inline like $PV = nRT$ or if considering $f : x \to \frac{1}{18}x^4$, we have $\forall x \in \mathbb{R}, f(x) \geq 0$. You can also do block content :

$$f(b) = \sum_{k=0}^{n} \frac{(b-a)^k}{k!} f^{(k)}(a) + \int_a^b \frac{(b-t)^n}{n!} f^{(n+1)}(t) \, dt$$

1.3 - TABLE OF CONTENTS

You can generate a table of contents using `#outline()`. Here are useful parameters you can specify :
- `indent`
- `depth`
- `title` (put the title inside brackets : [title])

For example, the previous table of contents was generated using :

```
#outline(title: [Guide content], indent: 1em, depth: 2)
```

1.4 - CITE AN ARTICLE

You can cite an article, a book or something like [1] (@example-turing). Just see the `#bibliography` command below - you need a `.bib` file containing the bibliography.

1.5 - NUMBERING PAGES

Useful commands to number pages (learn about numbering patterns) :

```
#set page(numbering: none)      // to disable page numbering
#set page(numbering: "1 / 1")   // or another numbering pattern
#counter(page).update(1)        // to reset the page counter to 1
```

Warning : put these instructions at the very beginning of a page, otherwise it will cause a pagebreak.

HEADING WITHOUT NUMBERING

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aeque doleamus.

1.6 - DUMMY TEXT WITH LOREM

You can generate dummy text with the `#lorem(n)` command. For example : lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

1.6.1 • SMALL HEADING

The small heading above won't appear in the table of contents (because depth is set to 2).

2 - MODIFY THE TEMPLATE

2.1 - CONTRIBUTE

Contributions are welcomed ! Check out the source repository.

You can also learn more about Typst packages release pipeline.
